ABOUT US

With over two decades of experience, the Patent Drawings team has completed thousands of utility and design drawings for a wide range of clients worldwide.

Our three main objectives are to serve you with professionalism, friendliness, and speed. We understand that every project has a deadline, and we work hard to meet or beat our clients' expectations by completing the drawings far ahead of schedule.

Our clients know they are getting quality and professionalism in every sheet we produce, and they trust us to be very experienced in drafting patent drawings.

- Our clientele includes Attorneys, Law/IP Firms, Corporations, Legal Departments, Patent Brokerage Firms, In-house counsels and individual inventors across the globe.
- Increased efficiency, flexibility, and production are the outcomes of using our patent services. We work hard to be our clients' "one-stop" source for all of their intellectual property needs by offering essential support at every turn, from creating and safeguarding intellectual property to commercializing it.
- Our workflow is integrated with our Six Sigma process methodology, which maximizes productivity and optimizes client workflows. Our solutions approach has been thoughtfully designed to use our special blend of technology, deep industry understanding, and strategic insight.
